

Data Continuity

The Change Management process establishes an orderly and effective procedure for tracking of all documents and data that result in changes to the final client database. The submission, coordination, review, evaluation, categorization, and approval of changes to the system requires a consistent process to ensure accuracy and completeness.

JCP has a rigorous process to guide clients in maintaining the integrity of their data. The Change Management process aligns as closely as possible to current client processes that may be in place to minimize disruption to client workflows and encourage adherence to developed policies.

JCP can assist in the following areas:

- Readiness Assessments
- Communication and Communication Planning
- Identification of Key Sponsors
- System Training for Client Users
- Change Management Policy Development
- Project Review
